

MoodleMoot 2010 “Facilitating students to create their own content”

Weds 14th April, Teaching stream, 2:30-3:30pm

The seminar will discuss ideas for leveraging the potential of (mobile) web 2.0 tools to facilitate social constructivist learning environments across multiple learning contexts scaffolded by Moodle. Highlighted are a design framework, identified critical success factors, and implementation strategy developed from the thirteen mlearning projects undertaken between 2007 and 2009. The projects encompassed five different courses, forming five case studies spanning from one to three years of implementation and refinement.

2:30pm Introductions (10)

History of the smartphone – Lethal Weapon1

Vodafone Fold add

5 Polleverywhere – what type of cellphone do you use?

Wiki Notes – link

5 Download Kaywa Reader <http://reader.kaywa.com> or txt “qrcode” plus 'Firstname' and 'Secondname' to +64210382736

OR get Upcode **<http://www.upcode.mobi/>** - or you can send a SMS (text message) to: **+358 50 3100075**

Decode QRCode to get notes on cellphones

2:40 MLearning Intro (20mins)

1 Concept Map

2 Design Framework

5 Mobile Affordances

Student Prezis

5 Collation of Web 2.0 via Google Reader Feed and Blog Roll into Moodle

5 mms to Flickr example looked10nation@photos.flickr.com

5 txttools demo – txt wiki url

5 Embed UStream

5 Twitter – txt to Twitter, 8987 START to setup, then 8987 #moot10 to Twitterfall
